

are accused of "police brutality." When the police display an almost limitless patience, then the "technicians" place their sharp-shooters and snipers to victimize policemen and Negroes alike - because that is what they are really after: victims. When a Negro mother falls shot in a riot, the "technicians" rejoice because they very well know it is in this manner that hate can blind human intelligence. This is one of the typical strategies for Communists use in their struggle for conquest.

2. Wars of "Technicians"

In my country, Cuba, it was the hate against Batista; later, hate against the so-called "capitalists"; next, it is hate between the races. The aim of the "technicians" is to promote the hate of the Negro against the white... and the white against the Negro, because it is the "technicians" hope that the white will react violently to unthinking rampaging of the mobs of Negroes who are being used as pawns in this grim game of black-red revolution.

"Technicians" infiltrated into anti-Negro movements would not hesitate to promote hate among those whites whose mental capacity won't permit them to see that they are being duped, and are then pushed into murder and violence against the Negro citizens in furtherance of the hate campaign that serves so well the purposes of the "technicians."

They might show themselves in public with their eyes full of tears, but the "technicians" always rejoice at the news of violence between the races. Why is it that violence usually follows "non-violent" speeches?

There is still time to put a stop to this Communist-inspired and controlled insurrection. There are many whites with enough mental capacity and open-mindedness to search in earnest for solutions to the racial problem, and there is a majority of Negroes who want those answers to be peaceful. But those leaders of either faction who wish their disputes can incite the masses to revolt must be neutralized.

Is Cabotage Next?

Approximately a year ago, a friend of mine of the Negro race, a native of a Central American country but a resident in the U.S.A., explained to me how some of his fellow workers called him "white lover," only because he did not actively hate the white man. When during his talks the Viet Nam situation came up, one of his Negro fellow-workers who seemed to be

active in racial efforts, told him that the Americans should not be in South Viet Nam and that they will lose the war there. When my friend pointed to the great production capacity of this country, he was told that such capacity would only exist until "they" receive the order to start sabotage. Then, the agitator claimed American production would be reduced to a minimum or even stopped, leaving this nation completely defenseless.

The Congress of the U.S.A. owes to the sensible Negroes and whites of this nation a thorough and immediate investigation of these "crises" before it is too late....

Meanwhile, the honest, hardworking Negroes with a sincere desire for the social progress of his race in the community he lives in, in order to reach the level to which he is entitled, must avoid being blinded by those "technicians" and denounce them wherever and wherever they are found. He must help his fellowmen from being taken in by the hate promoters who poison their minds with the excuses of their racial differences. These are typical Communist tricks to agitate the masses for their own designs, even when the price is the lives of innocent Negro mothers and children. On the other hand, the honest hardworking whites, with a sincere Christian spirit in the conviction that we are all children of the same God, and therefore, all deserve equal justice, must also refuse any attempt to make him react with hate and even violence against the Negro. If any white man ever takes the law into his own hands, let him be aware that at THAT moment he is acting as an unconscious agent of the Communist "technicians" whose only real aim is to destroy this nation. This red (Communist-inspired) and black (using the Negro problem) revolution inspired by the insurrectional thesis of Leon Trotsky and with the support and aid of Fidel Castro and his agents, can still be stopped. It is in your hands, American citizens, to avoid the dismemberment and destruction of your country internally.

I had a security to which I could escape when the Communists took over mine. Where would you go if they ever take over yours?

The Black and Red Revolution in the U.S.A.

By Dr. Carlos Britguier

A CALL FOR A
CONGRESSIONAL INVESTIGATION
OF THE "TECHNICIANS"
BEHIND RACIAL RIOTING

Congress Should Investigate The Real Causes of Riots

An indisputable reality is the manner in which the U.S.A. is being jolted from one end to the other by the riots and violence, disguised by the "masters of deceit" as social-economic or racial incidents but that, after careful analysis, can be exposed in their true light as Marxist-Castroite in origin and inspiration!

Leon Trotsky said: "To start an insurrectional movement, one needs technicians in that art, only with technicians, as well, can such a movement be stopped."

Such an insurrection is being attempted in the U.S.A. The "technicians" are working on its foundations, in its gestation; if other "technicians" do not come out and put a stop to it now, only many sad days of blood and mourning can be expected for this great nation.

Previous Warning Not Heeded

Three months before the assassination of President Kennedy, I insistently requested through a news release an investigation by the Senate of one Lee Harvey Oswald, but no one extended to listen - not even to publish later release. It was sad and shocking to learn later how easily that Oswald had killed the President of the U.S.A.

Today, I am again strongly recommending to this nation a detailed and extensive Senate investigation concerning the true origin of the riots which have been shaking lately some of the principal cities of this nation, and shocking the rest of the U.S.A. Sensible Americans do not believe the "easy" explanations and theories which we are being told is the "real reason" for racial revolution.

There is an absolute need to expose the agent provocateurs; but such investigation should be without the participation of Senators Fulbright and Moore, because of their recently

DR. CARLOS BRINGUIER

Carlos Bringuiere is the only Louis Armstrong known to have debated the President's assassin, Lee Harvey Oswald. This new famous "radio debate" between the communist, Oswald, and the anti-communist, Bringuiere, was broadcast on a New Orleans radio station on August 21, 1963. Three months before President Kennedy's assassination, Bringuiere was the man who exposed the so-called Marxist Oswald after he had made an unsuccessful attempt to infiltrate the anti-Castro movement which Bringuiere headed in New Orleans.

democratized, recklessness, regarding their pro-Marxist solutions concerning Cuba and Viet Nam.

Planned Guerrilla Warfare

Still, without knowing exactly why or how, riots were provoked and exploited in Rochester, Philadelphia, Los Angeles, and later in Chicago, New York, Cleveland, St. Petersburg, and Omaha. Each of them were immediately classified by the press as caused by the poor living conditions of the Negroes in said cities. However, we see that the immediate spark that precipitated each of those riots had no relation whatsoever with racial or economic-social problems. In San Francisco, a Negro policeman shot another Negro who was robbing a business place one night, and the streets were immediately filled with bands of Negro men shouting, "Death to Whities!" with which they rally Negro support to ignite a riot among mobs. In some instances, the master strategy of those riots can be plainly seen. This is not spontaneous reaction because of discrimination or high temperatures. In one of the affected cities a building was set on fire, and the firemen rushed, as is their duty, to put out the fire and save property and life. They were shocked by the inhumanity of strategically placed sharpshooters who kept them away from the configuration. This was not the case of an enraged mob setting fire to a building; it was a planned operation by the "technicians" who ordered the fire and then employed snipers around it in a typical guerrilla fashion, to create confusion and chaos, the victims of which later could be called "martyrs."

The saddest part of this insurrectional process is that those who instigate and direct these riots are always safely away from the path of bullets and the rest of the violence which they create. We see mothers in search of their children, innocent bystanders, and children who have not yet learned the real meaning of hate becoming victims of that violence and those bullets. There are those "technicians" and mercenaries who openly preach for extreme violence. Others hide behind the hypocritical call to "non-violence." Neither are trying to find solutions to problems but are seeking only to use martyrs for their personal ambition, or further exploitation for the Black-Red revolution.

What do these 'technicians' want?

These "technicians" are looking for the confrontation of races, but only because they know that this is the only way in which they can break down the strength and fortitude of this nation, the first step to overcome the U.S.A. These "technicians" are not interested in the white and Negro living together in peace and mutual respect as human beings created by the same God; on the contrary, they infiltrate both segments to instigate hate and violence, and better to divide and separate the races. When police are forced to use their weapons in a riot, in their attempt to put a stop to violence before it gets out of hand, they

- DOCUMENTED PROOF -

For proof of Communist influences in racial rioting, we refer to a monthly newsletter entitled "The Crusader," published by Robert Franklin Williams, a Negro wanted by the FBI for crimes committed in Monroe, North Carolina. The June 1964 issue was discovered by police being distributed to Negroes in the Watts section of Los Angeles and other areas where violent insurrection has taken place. Detailed instructions were contained in the newsletter concerning the manufacture of gasoline fire bombs and methods of sabotage of public utilities and other techniques of guerrilla warfare in our cities. Robert F. Williams also was a regular broadcaster over Radio Free Dixie from Havana urging Negroes to arm and train themselves for revolutionary insurrection.

J. Edgar Hoover, Director of the FBI, has repeatedly warned that Communists have infiltrated themselves into key positions in the civil rights movement.

In 1963 Congressman Albert Watson of South Carolina revealed the Communist affiliations of 59 of the leading officers and directors and sponsors of the National Association for the Advancement of Colored People.

Assistant Director of the FBI William C. Sullivan said that more than 200 Communists were among the civil rights marchers on Washington, D.C. in 1964.

Martin Luther King was revealed to have used identified Communists, Hunter Pitts O'Dell and Beyond Rustin, in key positions in his movement.
